

Certified Renovator

Lead Safety for Renovation, Repair & Painting EPA October 1, 2010 Certification Extension

Effective April 22, 2010, the EPA requires that all home improvements contractors, property management firms, handymen or others compensated for renovation that disturb more than 6 sq ft (interior) and 20 sq ft (exterior) of paint or surface coating in pre- 1978 housing where a child resides or is expected to reside, complete training, use safe work practices and verify that the work area is clean after completion of renovations. Renovation firms must have at least one Certified Renovator and obtain firm certification from the EPA.

As a result of the above, the EPA has recently placed an extension on becoming certified under the new Renovators Rule, which is **October 1, 2010**. EPA and HUD developed this 8 hour course to instruct renovators, painters, and maintenance personnel how to work safely in homes with lead-based paint. This course is also approved by HUD, in accordance with the Lead-Safe Housing Rule (24 CFR Part 35), for training contractors working federally owned or assisted housing. If you have not become certified, we are offering an opportunity to do so as follows:

Date: Wednesday, September 22, 2010 **Time:** 8:15am — 5:15pm

Location: Curtis Lumber, 885 Route 67,
Ballston Spa, NY 12020

Fee: \$195 **Registration Deadline:** September 13, 2010
